

Westwood STEM Program

We offer science and technology programs in Westwood for children ages 7 and up. The children can develop interests and skills in programming and robotics while having fun. We will adjust the program slightly based on the kids' interests, skill levels and age. The summer STEM program's main themes are to learn STEM skills, explore interesting things and have fun. The activities include:

- Programming and robotics - use Lego Mindstorms robot kit or Arduino kit
- STEM related activities, like build and ride a hovercraft, web design, video production
- Art and craft
- Chinese language and culture
- Sports and games (soccer, basketball, volleyball, ping pong, badminton, etc)

We will offer computer science, programming, website design, video production and Chinese language classes in September.

For more information on our summer program and regular classes, please contact Catherine Qiu at Catherine@mitiusa.com or 781-8886182. Check out our website at www.chinese-academy.org
